

Senior IT Project Manager (#18084)

CONTRACT

www.prostaff.ch/jobs/18084

Beschreibung

Our Customer's IT is running a number of smaller IT projects involving primarily application integration and data integration topics. For this we are seeking an "IT Project Manager" who has experience in software applications projects, the application development lifecycle, but also hardware related topics such as databases, standard approaches to interface and integration, Kafka or enterprise service bus, etc. The project manager will scope, plan, execute/control a number of work streams in parallel. You have a technical background and are able to make some technical contributions, work with requirements collection and analysis, as well as coordinate the work of the technical participants. Moreover you need to work in close cooperation and alignment with Business stakeholders, Applications and IT Operations and IT Architecture.

Anforderung

You bring the following experience and skills:

- Expertise of software applications projects and application development lifecycle
- Expertise of hardware related topics such as databases, standard approaches to interface and integration, Kafka or enterprise service bus, etc.
- Expertise in managing multiple projects simultaneously of between 3 and 10 people each and Stakeholder Management (external vendors and suppliers)
- Good understanding of basic contractual aspects of working with external vendors, etc.
- Very good English knowledge (native) German is an advantage
