

Solution Architect Channels (#19034)

CONTRACT

www.prostaff.ch/jobs/19034

Beschreibung

For our customer a bank in Zurich we are searching for a Solution Architect within the Channels domain, ensuring delivery of artefacts defined along customers project methodology (solution design, security concepts):

- Stakeholder Management, incl. strong interaction with our partners from central architecture, security et al.
- Decision Board (e.g. STC) preparation in terms of architectural items
- Specification of conceptual and logical architectures to meet strategic business, financial, and technology objectives
- Assist solution development and potentially demonstrate technical feasibility through mechanisms including proof-of-concepts within bank providers
- Provide comprehensive architectural support for all aspects to ensure proposed solutions are technically viable and also consider harmonization in landscape wherever applicable
- Work closely with business and technical teams to ensure successful rollout of the solution
- Validate functional and non-functional requirements and make appropriate design adjustments, as well as provide effort estimates to support project management
- Conduct evaluation of new technology platforms and components and be the primary interface to product /technology vendors
- Develop standards, patterns, and best practices for reuse and acceleration

Anforderung

You bring the following skills and experience:

- Higher education in computer science / Business Informatics
- Demonstrated expertise as a Solution Architect in the area of front technologies
- Strong experience with IT security standards and integration of client-facing web applications
- Strong expertise with web application architecture and development
- Ability to define, document and/or validate logical and physical architecture for a proposed solution, applying all relevant enterprise and bank defined standards
- Ability to translate complex concepts into multiple architectural “views” aimed at varying audiences
- A proven track record in delivering projects of various sizes (functional complexity and/or resources)
- Proven skills in digital transformation, automation and straight through processing solutions
- Hands-on experience in SOA, data analytics, multi-channel services and event management
- Experience in Enterprise Service Bus integration, REST/API integration, Containers, Micro services
- Expert knowledge in IT operations, Agile Methodology, Software Development Lifecycle, and Systems Architectures
- Knowledge in DevOps
- Knowledge of JIRA or other common state-of-the-art agile collaboration tools
