

## IT Security Architect (#19007)

### CONTRACT

[www.prostaff.ch/jobs/19007](http://www.prostaff.ch/jobs/19007)

### Description

We are looking for an IT security architect for our customer, an international service company. You will support the internal team in the following tasks:

- Plan, research, design and implement a robust security architecture for new and existing IT projects, both for on prem., in cloud and for hybrid solutions
- Review and assess security compliance for new installations, connectivity, updates, logging or changes to network, application, system, security, scanning, and end-point (for example mobile devices, servers, workplaces etc.) technologies, solutions and infrastructures
- Provide security analysis and approvals for changes to operational infrastructure
- Take part in application, system and architecture security and risk analysis for new or changed IT applications, platforms and systems
- Provide technical supervision (and guidance) to IT as a subject matter expert for LAN, WAN, Wi-Fi, VPN, network infrastructure components and storage security.

### Requirements

You bring the following qualifications and experience:

- Fluent in English (German a positive advantage)
- University degree in engineering, computer science or similar
- More than 2 years in an IT Security Architecture role for a global company
- VCP-DCV, AWS, PRINCE, TOGAF, MCSA, MCSE, Cloud Platform and Infrastructure qualifications an advantage
- Forensics experience an advantage
