

Solution Architect Wealth Management & Advisory (#19046)

CONTRACT

www.prostaff.ch/jobs/19046

Description

For our client, a renowned private bank in Zurich, we are looking for a Solution Architect Wealth Management & Advisory. Our client has embarked on an ambitious digital transformation initiative to bring their digital client experience to the next level. The initiative encompasses private banking and intermediaries businesses globally.

We offer you an environment and colleagues who motivate, challenge and help you advance and the opportunity to work on digital products and services that will make a difference for our clients. As a member of the Front Application delivery unit, you will act as a Solution Architect for projects in a dynamic and fast-paced team. You will work closely with project manager, software development, business analysts and operations experts to drive the delivery of the roadmap for the journey ahead of us, to enable further digital services and offerings to our clients.

Requirements

You bring the following Skills and Experience:

- Higher education in computer science / Business Informatics
- Expertise as a Solution Architect in the area of Wealth Management & Advisory (understanding of financial markets, financial instruments, and portfolio management)
- Expert knowledge in IT operations, Agile Methodology, Software Development Lifecycle, and Systems Architectures
- Strong experience with IT security standards and integration of client-facing web applications
- Strong expertise with web application architecture and development
- Ability to define, document and/or validate logical and physical architecture for a proposed solution, applying all relevant enterprise and bank defined standards
- Ability to translate complex concepts into multiple architectural "views" aimed at varying audiences
- A proven track record in delivering projects of various sizes (functional complexity and/or resources)
- Experience in Enterprise Service Bus integration, REST/API integration
- Expert knowledge in the design of business object model and transformation of conceptual models into physical data models
- Track record in the development of applications that include long running concurring human centric workflows
- understanding of rule engines
- Strong communication skills (fluent in German and English)
- Excellent interpersonal, problem solving, and knowledge transfer skills
- Self-driven, independent working abilities, team-player, hands-on mentality, comfortable with driving and managing change
