

Solution Architect (#22016)

CONTRACT

www.prostaff.ch/jobs/22016

Description

- As a member of the Front Application delivery unit, you will act as a System Architect within our Digital Channels Release Train. You will work closely with the Product SCRUM Master, the other system architects and your SCRUM team to drive the delivery of the roadmap for the journey ahead of us, to enable further digital services and offerings to our clients.
- As part of the system architecture team in our Digital Channels Agile Release Trains, you will define and communicate the technical and architectural vision, define the architectural runway, and define guardrails for the SCRUM teams.
- Analyse trade-offs between different alternatives and create transparency about technical debts and tactical and strategic investments. Present architectural options to senior management and decision boards.
- Decompose systems in components and subsystems, define their interaction patterns, and specify the interfaces between them.
- Ensure that software and integration architecture complies with our enterprise wide standards and guidelines.
- Collaborate with Product Management, Enterprise Architecture, Domain Management, Suppliers, and Customers to ensure that architecture is fit for purpose.
- Conduct evaluation of new technology platforms and components and be the primary interface to product/technology vendors.
- Support the development of application and program roadmaps by providing technical expertise and effort estimations.

Requirements

- Strong expertise with digital channels like E-banking, mobile banking, and prospect portals
- At least one year of experience in an architectural role within financial industry or consulting with banking / insurance focus
- Knowledge and curiosity in current technologies, IT trends and financial market developments
- Strong personal drive with good organizational skills
- Strong communication skills to collaborate with multiple stakeholders

Preferable:

- At least three years of experience as web software developer (e.g. Java, .Net, Java Script, React, Angular, relational databases)
- Experience with agile projects/programs (SAFe certification is an advantage)
- Good understanding of Kubernetes and other
